Research Interests

I study how VLMs and LLMs find and use evidence in their input, such as the right image among many or a negation in a caption. I use synthetic data and post-training to make them more reliable, and interpretability to find where they fail.

Vision-Language Models: Synthetic Data and Post-Training	**NeurIPS 2026**, ICML 2026, **ICCV 2025**
Large Language Models: Reasoning and Retrieval	NAACL 2025 Findings, ACL 2024 (Oral)
Trustworthy AI: Interpretability and Robustness	**NeurIPS 2026**, ICLR 2024 (Spotlight), ICLR 2024

Education

Ph.D.	**Seoul National University**, Electrical and Computer Engineering Integrated M.S./Ph.D. program; Advisor: Prof. Sungroh Yoon	Mar. 2022 – Aug. 2028 (expected)
B.S.	**Seoul National University**, Electrical and Computer Engineering	Mar. 2016 – Feb. 2022
